Subject Opinion about the current Health Care Reform model

Urgent Return receipt Sign Encrypt

To whom it May Concern:

I would support the current mode to continue to rely solely on government funding to support the health care system. It is because I am in one the High-risk group, which I am a chronic patient. By changing to any other model, I would have to pay more to go to see a physician. I am already under a low-income or even no income category. Because of the safety net, I would be able to go to see a physician. By changing to any other model, I probably wont be able to afford to go to see a doctor. Especially those models with health insurance plan. There would not be any insurance plan for people w hom have mental illness.

Yours Sincerely,

Anonymously
