Subject I Would Prefer Every Hong Kong Citizen to Buy
Compulsary Medical Insurance

Urgent Return receipt Sign Encrypt

Dear Sir/Madam,

After seeing all the queueing up of patients in the emergency wards of public hospitals and having been a patient who has had an operation (but because of the surgeon's being in a hurry to operate too many patients) but been treated very painfully during the operation, I strongly recommend that every Hong Kong citizen, no matter young or old, normal or disabled, healthy or sick, to buy compulsory medical insurance. I have lived in Canada for a few years, when I was sick, I could easily went to a clinic and see a doctor. It was just like going out to eat, simple, easy and comfortable.

In Hong Kong, the private clinic doctors are too vacant and the public hospital doctors are too busy. The resources are very mismatched!!! Actually, this can be changed administratively so that every one is happy, the patient, the private doctor, the public doctor and the insurance agent. Why not practising this as soon as possible!

That is all for now. Thank you very much for reading my comments! Have a wonderful Easter Holidays!!!

Yours respectfully,

Mary Barbara Tam Wang
