Subject Opinion on Health Reform

Urgent Return receipt Sign Encrypt

Dear Sir/Madam,

Thank you for the initiation to have discussion among HK people to let us know the future situation of Health care.

Thank you for the Government for what you have done in the past to take care of the health of HK people.

I agree to let the HK people to share the responsibility to share the financial burden of own health. People in HK do not have the mind-set to save money for the medical care in future.

According to the news, HK people's saving is huge as a whole (三萬億). But many of us are not willing to pay for the medical care whereas we are willing to spend money in clothing, oversea travelling, expensive cars and goods, beauty, etc. It is a good move to alert HK people this point.

I support

1. the choice of "buying insurance + saving" for the future planning.
2. implement the health reform as soon as possible (because the economic condition now is good in HK, the resistance will even be higher if the economic situation gets worse later)
3. be proactive in implementation, it can be estimated that the ones who speak out the most will be the ones who show objection. But those who support the health reform will be more passive.

Regards,
Leung Kwok Shun
