Subject Comments to Health Care Reform

Urgent  Return receipt  Sign  Encrypt

Dear Sir/Madam,

Regarding the reform, my comment is very simple from a mid-class citizen's point of view - as I have already joined a medi-care package with an international insurance company, it is absolutely not my willing to pay extra to government's health care plan when the reform is targeting to take other low-class people who will pay much less proportionally or nothing at all. If the government can't make sure the fareness when this reform is carried out, why will the government take new risk of social turbulence? Is it worthy for uncertain change?

It is government's responsibility to calculate the burdens of mid class people; when these people are repeatedly ignored, the heads of government will pay for it eventually.

Thank you for your attention

from a citizen who does not and will not support the reform
