Subject Healthcare Reform

Urgent  Return receipt  Sign  Encrypt

Dear Sir,

I say "NO" to what is proposing in the Health Care Reform materials because Hong Kong Government should learn how to improve the utilization of all taxpayer's money, instead of keep asking money from the taxpayer. The government should find ways to reduce the budget of the FHB, the overstaffing of the management staff.

Secondly, the contribution in Health care means another form of tax to all honest tax payer which eventually will be beneficial to those tax escaper and also those who do not take responsibility for his own life. ( Because government is very loose in giving out money )

I have no objection who help those in need, but the government should do its job and tighten the approval in all social welfare.

Sincerely Yours.

Hon Chun Kong
