**Subject:** 100% (completely) against medical insurance

Dear Sir,

1. In USA, currently there are many people cannot received any medical care
2. In mainland, currently there are many people cannot received any medical care
3. Currently doctors working in HA needs to complete requests forms / reply letters from insurance companies after office hours, and sparing their dinner time and sleep time. It cannot be dream of the conditions if the medical insurance scheme will launch in future.

Regards,

Thomas
