Hello there,

I am against this policy because firstly I do have my personal insurance already. I am also a Canadian citizen. I had medical care from other country already!

I strongly against the policy of forcing people to pay extra from the salaries! Same as MPF, I really disagree the effort! I disagree because company are private, no rules and no policies! It's very complicated for me! I am born in HK and I just got back since 2002. From that day on, i have changes to different companies, all the companies have their own MPF from different company!

I had no idea how to remove all of my MPF from one place to another already! I will hated to have another forces from my salary!

I really thinks who ever wants to have the medical care should pay, never force people to do so!

Thanks

Angela
