Dear Mr. York Chow,

Please don't treat us as fools again. We have been trapped by MPF once and will not be cheated again. I prefer proposal (b) or maintain the present arrangement for the reasons as follows: -

1. You fails to provide detailed data on how proposal (a) and (c) to (f) can cope with our future health needs. In such lack of information, how we can compare the advantage and disadvantage of each proposal.
2. Similar to MPF, our hardly earned income will used to feed those fund managers and financial institutions again.
3. The present health and medical expenses are shared amongst all tax payers, including profit tax, property tax, in direct taxes payers. Why should we depart from the present policy and the middle class has to bear all the health expenses in future? This is utmost unfair and is a major shift in the tax policy without any explanation.
4. It will be a good excuse for employers to withdraw their present medical benefits for employees when there is universal medical insurance coverage.

I sincerely hope that Hong Kong can become a healthy and fair city and a paradise for all the people living here; not just the poor and the wealthy only.

Eric
