長期醫療發展:

1. 建議開辦類似消防局防火計劃，從教育做起，小學加入【健康科】，讓小朋友從小可以了解健康衛生，亦讓家長可以了解不同疾病預防方法，病徵，相信可以改善醫療開支。
2. 加強危機處理訓練及與國內聯絡，像天文台天氣預測。
3. 醫療失誤方面，應採取開明態度，對不負責任的醫生必須開除醫生執業資格，讓各盡責任的醫生可以為病人診証，減少因delay而令病情惡化及浪費不必要金錢。我有個同事的兒子近日發高燒，約38.3度，當值醫生不給退燒藥，原因根據指引要達38.5度才可以給予藥物，結果我的同事的兒子在醫院由晚上18:00等到第二日早上06:00，終於38.5度，可以施藥。請問如果等12小時，小朋友燒壞腦，或出現並發症，誰來負責？與其都施藥何不早12小時施藥?! 恰巧這所醫院是屯門醫院，近日有小朋友不幸死亡，各傳媒都廣泛報導。

I hope you can consider more & think more how to improve the medical services in HK. I do think being a doctor should be more smart & more respect with your career. To be honest, fool the people will lead doctor lack of support. If such occur, i'll suggest to open market for all doctors overseas including UK, USA, Aust & NZ, Canada ... etc to practice in HK. I do think it can help the pricate hospital more doctor like the HK Jockey Club, local racers do not have chance to ride the horse.
