醫療融資意見

To: Government

The government must give the guideline let citizen buy the medical insurance and crises cover product could waive the tax payment. Some people buy these before it is not suitable compulsory to buy medical again.

Some insurance in HK issue the medical product guarantee renewal until the client 100 and base the health condition under the policy issue day. Some information issue by government is wrong (Government must study all insurance provider condition carefully, that may ignore the benefit of the insurance holder)

The other important point, government gives people some way to know fee of operation, which let the people with reference about the charges of private doctor. That may reduce the lose of insurance company and let us pay less premium,
