Subj Another Greatest Deceptive Case in the
ect World - Healthcare Reform

The greatest deceptive case in the world is Hong Kong MPF scheme. In 2001, HKSAR government commenced the greatest deceptive case in the world, the HKSAR government forced all Hong Kong workers to pay the MPF scheme, but it did not cut the tax structurally.

Hong Kong SAR government wastes Hong Kong public treasury in every second:

1) did not lay off over 160,000 redundant & rubbishy civil servants. Everybody knows the rubbishy civil servants only 1/3 productivity and efficiency compared with the private sectors.

2) the government departments did not corporatise or privatise. most of government departments are wasted money seriously.

3) the doggy king (CE) expanded the government structure obviously. In the name of "Small Government, Big Market" but the truth is "Big

Government, Small Market". The government competed with the private sectors.

4) Hong Kong is extremely famous on Government colluding with the merchants.

If Hong Kong SAR government is in deficit, It should ask the government property department and water department. Ask Government audit department for the reasons.

Consequently, Health care Reform is another deceptive case in the world. The Hong Kong SAR government is robbing the money again.
