My opinion as follows.

1. The solution on financing should be a mix of various options proposed in the paper like extra tax, higher medical charges and individual medical insurance.
2. Administration cost of various options unknown e.g. 3% or 30%
3. Coverage and benefits of different options e.g. entitlement to private wards
4. Contributions by employers, seems none mentioned in the consultation
5. Contributions by HKSAR government except as last safety net as usual (but with minimal quality?)
6. Compulsory setup of electronic database of patient records requires little capital and should be fully implemented without further delay

Regards
Cheung
