Subject An opinion from middle class

Urgent Return receipt Sign Encrypt

To whom it may concern,

I strongly opposed the idea of the Health Care Reform. Being the middle class, I have contributed enough to the government, the salary tax and MPF. Since I am not qualify for the public housing, I am struggling for to buy a condo in HK. The transportation fee is so expensive. The gov't just allowed the raise of fee from 4 - 7% but there is no increment in my salary. If contribute \$300 -500 per month, it is already 2 weeks of my lunch money. When will I have enough downpayment for my own condo. I still have to pay rent and utility expenses.

The government should increase the tax for the high income class. In Sweeden, the high income class pay 45% salary tax. The HK gov't should not "rob" us anymore!
