Subject Comments on Reform of Health Care System

Urgent Return receipt Sign Encrypt

Comments:

1. The proposed system is just another way of tax directly placed on the middle working class which is totally unfair as this group has already shouldered a heavy tax burden.
2. The rich wouldn't be paying as their income mainly is from business income which already has enjoyed may tax deductible items.
3. 1 and 2 above creates a wider poverty gap between the rich and the poor.

Views:

I would prefer the current health care system which is highly supported and funded by the government revenue. If at one point there's insufficient fund to cover the health costs, then higher taxes of course should be the way to raise funds to finance the existing system.

Yours sincerely,
Dr. Kelston Wong
