Please respond to

Dear Sir/Madam,

I'm totally disagree with your policy of implementing **mandatory medical scheme**.

Even though there's high economic growth percentage during the past year. My company is not increasing my salary up to the inflation rate of around 6% this year. In accordance with the employment contract, it does not mention the employer should increase or review my salary yearly. In other words, how much I earn is not controlled by myself is controlled by my employer. During the past 2 years, I've got one salary increment to afford the ever increasing inflation rate in HK. As there is a large supply of the labour, although I'm a Master graduate. However,

There's a lot of cheap labour from all over the world to come to HK for work. My company policy is if you are not satisfied with your salary earned, please leave it and there's a lot of people waiting to work here. This is the real reality of the SME in HK. We are not the government related organisation,

The civil servant or related organisation staff has salary scheme, review salary scheme, but we don't have.

I believe most of the SME also don't have this, even though they have this type of scheme, they won't be

carrying out. It's just a paper talk. Therefore, how can I afford to contribute a fixed amount for this mandatory medical scheme?

I'm a taxpayer which I need to pay around HKD3,000/- per year. However, I have never used the public hospital as it's always full and occupied. I have never used the police service. I have never used fireman service. I have never used the library service. The reason is it's always full of people and crowd of people.

I, as a HKSAR citizen, I'm forced to pay the tax without enjoying the government service. This's the reality, I can't change. However, if your government insists to implement this scheme as it's the habit of your government. I can't do anything on it.

I don't know why I need to work as whatever I earn from my work, I need to contribute it to the HKSAR government.

Why I need to make contribution that I can't and I won't use the medical service?

Also I need to pay for others? Is it a joke? Anybody pay for me?

As in HK, the richest people is very rich whereas the poor people is very poor.

I agree that who use the medical service and pay for it by herself or himself.

Pls consider twice and listen the voice from the bottom heart of the poor HKSAR citizen like me.

Thanks and best regards,

Cally Cheung
