Dear Sirs,

I strongly disagreed all your proposal. My recommendation as below:

1. Cut gov't senior staff salary to certain percent, because this is violate the economic theory i.e. the low risk (gov't staff position is very safe without fear of redundancy) low return (but the salary is higher than the market).
2. Increase 0.5% profit tax rate, because this is compliance with Marx theory i.e. most of the generated profit tax is came from labour. Then, it will be used to set up a medicinal fund for future.
3. Gov't buy the expensive medicine from medicinal company for compliance with economy of scale theory, then re-sell to citizen & clinic.
4. Recuit low & cheap doctors from Midland China.

Thanks & regards,  
Pat.
