Subject Healthcare reform consultation document - opinions

05/06/2008 01:59

Urgent     Return receipt     Sign     Encrypt

Support:

The government should reform the current healthcare system

Against:

Any form of mandatory contribution schemes

Any mandatory insurance schemes

The government should:

- 1) Educate citizens to lead a healthy lifestyle (preventive measures)
- 2) For those mainland Chinese pregnant women who don't pay for the hospital room and board fees, NO birth certificates should be issued to them. The government departments concerned should work out a solution to implement this - whether it be an enhancement of the computer systems or internal procedures, etc.
