Subject Health Care System & Financing Reform

Urgent Return receipt Sign Encrypt

Dear Sir/Madame,

I think the most important thing that the Government should do is allow private medical sector to expand & let public who have money to go into private sector for medical care (including primary, secondary & even tertiary level medical service). The Government should provide financial assistance in setting up of more private hospitals.

Public should have the right to choose their own medical insurance & medical service they prefer on voluntary basis. **I think social health insurance, medical saving accounts, mandatory health insurance & personal healthcare reserve are bad options for the public.**

The Government should monitor & observe the medical insurance provided by insurance company & the Government should only cover those who are poor.

Thanks.

Dr. Chan Wai Hung
Paediatrician in a HA hospital
