Dear sir,

I vote Point six (insurance & saving), but I suggest :

- 1. deduct tax for the people who pay private medical & critical illness's money;
- 2. saving range same with MPF start from \$5000, around 2-3% and put on MPF's fund to grow the money. therefore, can decrease the admin & mgt fee use same pool. (more people to distribute)

I concern that:

- 1. how to control insurance companies's admin charge?
- 2. how to control hosptial & doctor's fee?- they claim the maxmium's fee and then the insurance cost also increase...increase .

Tks!

regards,

ada chan
