Subject My views on Health Care Reform.

Urgent Return receipt Sign Encrypt

Dear Sir,

I am writing to express my opinions on Health Care Reform as follows:

1. I understand the need of exploring and developing a new/enhanced financing model to sustain the future demand on healthcare.
2. It is reasonable to share the healthcare cost by both the government and citizens themselves.
3. Health insurance is a way for citizens to help reducing the burden of healthcare expenses.
4. However, choices should be given. **If the citizen has already bought private health insurance with appropriate coverage, he/she should be exempted from any form of mandatory health insurance/fund/tax.**
5. To define 'appropriate coverage', the government can issue a document indicating the minimum amounts of health insurance coverage for particular age groups, after conducting research/studies and consulting professionals.

I wish to remain anonymous when my views are published.

Thank you for your attention.

Yours faithfully,
