Dear Sir,

I do not think we should look for a third party to requisite and manage the fund for Medical Assistance.

Just imagine that you need so much money for the Medical Assistance, the biggest expense is Hospital, out-patient and drugs.

The Govt may consider to build drug factories to manufacture generic pharmaceutical products first, now the drug cost is very high. To build our own drug factory, produce more working position. We can set up district drug house to sell drug or let the outpatient patients to collect the drugs after consultation.

The Govt may set up clinics only for outpatients, like the private doctors' clinic.

Medical Student Grad. must served the Govt.clinic/hospitals 5-7 years before they are free to go out as Private practitioners.

Build more hospital, not expense ones, but practical ones,

Definitely no through a third party company, the MPF is already a big mistake, 2-2.5% Management fee annually is higher than the bank's saving account interest.

To fight against inflation is to decrease or minimizing buying. If the restaurant food is rising tremendously (I head a dish of Pook chop rice costs HK\$95.00 at a restaurant in Pak Sah Road, Causeway Bay.) Then I will cook myself.

They are so many learned specialist in the Government, earing a very high monthly salary but acts like a contractor subcontracting the work outside to the companies to do the job. The Govt. is just a money spending machine but not productive at all.

As a Govt Officer, they should act like parents to care for his sons and daughters (the people).

Thanks for you attention!!!
