hi,

I'm a junior doctor working as a critical care trainee in hospital authority.

i 'd think that the 6th choice(Personal Healthcare REserve) is the choice that I dislike most, the message I get is that this proposal will increase the financial burden a lot for the lower income citizens(ie monthly income of \$10000 to \$20000)

I am far from contented with the current health care system, but I 'd accept increasing tax for raising the budget, and impletementing differential user pay system(ie those who can afford 'd need to pay more in public hospital) would promote less abuse of the system.

i' d say i absolutely reject the Personal Healthcare Reserve proposal !
