Subject Health Care Reform Consultation

Urgent Return receipt Sign Encrypt

Dear Sir/madam

As a hongkonger, I strongly disagree to the proposal of the subject. I can say our family are in the tier of middle-class in HK and we had some operations to be done in the hospitals, private ones. And we frequently went to the private clinics for consultation, seldom went to public hospitals. Currently, most of the big companies offer medical insurance for their employees, those people will not go to public hospitals for consultations or treatments because they are covered by the Company's insurance.

I've talked to some Australian friends (not Australian Chinese) about their medical system in Australia which they told me is a lousy and unsuccessful one and they thought if Hong Kong implements the similar one, the same problem will also exists. Our Government tells us how wonderful, successful about the Australia's medical system which are only liars.

For those in the lower-class of the society, they will suffer the most for new system. Hong Kong is a place offered so little social benefits to the people already, why you still have to exploit their medical benefits?

I think more reserves to be allocated to the medical service in HK is more appropriate than all the other useless ways. I think more salary tax is acceptable for us.

Hope you will listen to us.

Hong Kong Citizen.
