Subject opinion about medical fund

Urgent Return receipt Sign Encrypt

Dear Sir or Madam,

my opinion is: the best way are (1) to set up "Central Medical Fund" and/ or (2) to encourage people to buy their own medical insurance by reducing taxes, which should be a non-compulsory action ... Government can liaise with industry to lower the price collectively - no confidence that compulsory "medical investment plan" provides effective results that fits common citizens.

Citizens especially hate the model of MPF, which gives immediate profits and benefits to investment companies but the common needs of employees and citizens are not guaranteed. faithfully there are already too much hatred among the hearts of common citizens on the issue of MPF.

Thank you for seriously considering the voice of common citizens & "middle class"
Mr Lin
