Dear sirs,

I am of the opinion that only a mandatory insurance coverage, closely monitored by HK government, is a viable long-term solution in Hong Kong. I would suggest the premium costs to be expressed as a % of net income, and capped just like are the MPF contributions. I reckon that 5% of the net income capped at say HKD.10,000 a year for an in-and-out-patient coverage would be acceptable by all concerned.

Regards

Oliver
