Subject [Possible SPAM] : I Support Option 5 - Mandatory Private Health Insurance

Urgent Return receipt Sign Encrypt

Dear Sir/Madam,

I support Option 5 - Mandatory Private Health Insurance because I like the Scenario that

- The insured will enjoy protection for their health risks which are shared out with other insured, and access to private healthcare services
- The high-risk groups (chronic patients, the elderly, etc.) will be able to enjoy healthcare protection through community-rated premium, and regulated terms including no exclusion of pre-existing medical conditions and continuity of insurance

As a member of middle class myself, I am willing to pay a monthly sum to an Insurance Scheme so that both the high-risk group and the low-risk group both can enjoy quality medical services. I hope if this option finally being chosen, the Hong Kong Government can run it as successful as the Singapore Government does.

Best Regards,
Leo Lam
