Subject health care reform

Urgent     Return receipt     Sign     Encrypt

Dear Sir/Madam,

All the options have their limitations and does not solve the health care problem. Issues raised including putting the financial burden to the middle class whose income is just above the cut-off monthly salary, financial costing to management structure to 'look after' the scheme (a significant portion of the money will not be used in health care but rather to support the monitoring staff and to the benefit of insurance companies).

Furthermore, the report focus much on how to generate more money but did not specify how it will improve the health care services. The 'Rolls Royce' service described for those participants is limited by the available resource and many participants are likely not accessible to 'Rolls Royce' service in reality.

Lastly, there is still room for more financial contribution from the government into health care.

Therefore, I do not support any of the options proposed.

Best regards,  
KS Lau
