Subject Medical Reform in Hong Kong

Urgent Return receipt Sign Encrypt

Dear Sir

I object for this. I think this is the only benefit offered in HK is the medical system. If this system is going to end, we have nothing left. The lower and middle class will be exploited by the government most if this proposal to be implemented.

From my point of view,

1. higher administration/services charges imposed would be more bearable for the citizens.
2. due to the big loss in medical services provided to non-HKers, more strict punishments and policy should be imposed to those people.
3. some medical insurance policies offered by the insurance companies encourage the insurer to use public hospitals to get the cash bonus. The government should issue something to suppress this.

No other new system would be better the existing one.

Best regards
