諮詢文件的意見：

I DO NOT support Option(2) out-of-pockets payment : poor people are not protected

I DO NOT support Option (3) medical savings accounts : unfortunate heavy users of medical services are not protected

I DO NOT support Option (4) voluntary private health insurance : my experience tell me that commercial insurance is unreasonably expense and even not being offered to some people who really needs it, for example, people who have troublesome health or old people.

Please do not disclose my email address should my response is taken as one of the responses to be publicized in future as public information.

(Mr) M Lam
