Subject Health Care Reform

Urgent Return receipt Sign Encrypt

My views regarding the consultation document, "Your Health, Your Life":

- (1) Health care reform and health care financial reform must be carried out in the following years in order to maintain the high quality health care services and sustainable development
- (2) Need to encourage public-private partnership in newly designed business models
- (3) Need to invest extra resources into the primary care and family care services
- (4) Need to encourage the general public learning the importance of health education, health protection and public health
- (5) I prefer to save money for myself, i.e. my own account. However, if private insurance is to be considered, I really want one party to ensure the quality of the services provided by the private insurance companies & the carers.
- (6) Should focus on the quality of services that are provided (both public and private); how to monitor? How to ensure that patients have choices?
- (7) I really think that people should not pay more than 4% of the salary or max. of \$800 per month.
- (8) Need to provide additional information on how to allocate the resources according to the newly proposed health care financial reform
- (9) Need to invest additional resources for training the professionals, developing and transforming into new model, and developing new IT system to support the new model in the community (betw both clinic & hospital settings)
- (10) Need additional resources for clinic and academic research
- (11) Government should remain the basic and main service suppliers for the needed and seriously ill people
- (12) In the long run, need to develop a city-wide programme and system for the affordable, high quality, and comprehensive healthcare services
- (13) At this stage, there is lack of long-term development plan. The main target or goal of the health care reform is not clear. General public do not know the pros and cons of any type of system.
- (14) There might be more than one business model. However, there should be the same target or goal towards the health care system & reform in Hong Kong
- (15) Lastly, I want to live in a healthy city.

Best regards,
Ms. Kwong
