To whom it may concern

I strongly feel UNACCEPTABLE for the Healthcare Reform!
Why government reduce tax and need to waste a lot of money to find other
burden plan for HK Citizens. If government got money to reduce tax, why
still need to squeeze us????

I have already bought my own medical plan and my company have health plan
for their staff, why I still need to spend the money to subsidies to it??
MPF already waste my money on the fund loss, why government still raising a
burden to us.

Why HK Government always be the BIG SPENDER, you should review your own
preformance and why the private hospital could spend less less less than
the government hospital??

Regards,
chan
